

As many of you are aware, this week, the Statewide Feeding Task Force, working through the Unified Coordination Group (UCG), announced Colorado received a \$3 million delivery of infant supplies from the Federal Emergency Management Agency (FEMA). These essential supplies will go to families who are experiencing poverty and not able to find resources to meet their basic needs. These supplies will also be available to families enrolled in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) and child care providers taking part in the Emergency Child Care Collaborative.

For more information about our local delivery and options, please contact Kathy Kennedy at 719-275-0550. The SPIN on Elm will be the distribution site. At this time there is no word on how many items of formula, wipes, and diapers each agency will receive.
